

Dear Mr. Caldwell,
Over the past three months Abby has grown taller and wider. She eats around 10lbs a day in feed and enjoys the fresh green grass that we now have. We are hoping to breed her to a bull named "JBA Cash". He will throw a lot of horn to her offspring. I have decided to sell one of my steers. I have just recently showed her at the Gulf Coast show in Brenham a few weeks ago. I think she's great in color and confirmation but lacks a little in horn and size compared to her competition. Over the past year she has qualified for the world show and enjoyed showing her. Thanks again for donating her to the Gulf Coast Association.
